

Foundation Casting Mould MWGA

water cooled

- o form plates above and below with interior-lying water-cooling heat exchanger- principle
- o no solvent, therefore
- o dry foundations
- o mounting-ready outside measurements
- o cell writing from resistant Silicone rubber own recipe over decades proved
- o metal parts of stainless steel
- o running water serves to the cooling the excessive wax in the catch tub
- o shut off- /control valve adaptation of cooling the speed working, low water consumption
- o standard sizes and special dimensions
- o Standard CELL 5,4 mm (790/dm²)
 Midi CELL 5,1 mm (850/dm²)
 Mini CELL 4,9 mm (945/dm²)
 Drone CELL 7,0 mm (490/dm²)

Especially high performance ensures through effective heat exchanger swift remove with one hand, thanks to combined vacuum ventilation, Discontinuation of the manipulation with the solvent, Cutting not necessary
 Bar time 50 to 60 seconds, 60 to 70 pieces per hour

Operation of two devices through a person possibly: during the cooling (about 30 seconds) in which one device, in the second device is provided with liquid wax, yield doubled

Accessories included: spatula, brush, instructions

Accessories extra: 44000100 wax melt pot 16L thermostat

44000105 wax melt pot 27L thermostat

44000110 wax melt pot 27L ES thermostat

Delivery time: Standard dimensions in store, specials and other cells 6 weeks, big numbers of pieces on enquiry

All dimensions possibly
